

WEEK 1

Aim

To create an ATS-friendly resume webpage using basic HTML elements.

Description:

This experiment demonstrates the creation of a structured resume webpage using basic HTML. The webpage includes personal details, contact information, career objective, educational qualifications, technical skills, work experience, projects, certifications, strengths, languages known, and declaration. HTML elements such as headings, paragraphs, lists, tables, images, links, and horizontal lines are used to organize the resume.

Program:

Resume Akasapu Pallavi Using Basic HTML

Program Code:

```
<html>

  <head>

    <title>
      Resume Akasapu Pallavi
    </title>

  </head>

  <body>

    <h1 align="center">Akasapu Pallavi</h1>

    <div align="center">

      

      <p>FULL STACK WEB DEVELOPER|ML ENGINEER|AI ENGINEER</p>

    </div>

    <hr>

    <h2>Contact Information</h2>

    <table border="2">

      <thead>

        <th>Information</th>

        <th>Details</th>

      </thead>

      <tr>

        <td>Location</td>

        <td>Maddilapalem, Visakhapatnam, Andhra Pradesh, India</td>

      </tr>

      <tr>

        <td>Phone</td>

        <td>[+91-6300072088](tel:+91%2063000%2072088)</td>

      </tr>

      <tr>

        <td>Email</td>

        <td><a href="[akasapupallavi@gmail.com](mailto\:akasapupallavi@gmail.com)" target="_blank">[akasapupallavi@gmail.com](mailto\:a

      </td>

      </tr>

      <tr>

        <td>Linkedin</td>

        <td>

          <a href="[https://www.linkedin.com/in/pallaviakasapu/](https://www.linkedin.com/in/pallaviakasapu/)" target="_blank">[https

          </td>

        </tr>

      </table>

    </body>

  </html>
```

<hr>

<h3>Career Objective</h3>

<p>

Aspiring AIML student with a strong foundation in Python, AI concepts, IoT, and Web development. Seeking an opportunity to leverage

</html>
```

Details About Program

Saved in: Week 1 folder of the repository.

File used: HTML file with an image used for the profile photo.

Technology used: HTML.

Execution: The HTML file is opened in a web browser.

Working: Basic HTML elements are used to create and organize different sections of the resume. Tables are used for contact information, educational qualifications, and project details, while lists are used for technical skills, work experience, strengths, certifications, and languages. An image element is used to display the profile photo, and hyperlinks are used for contact and LinkedIn information.

Output:

The resume webpage displays Akasapu Pallavi's name, profile photo, career title, contact information, career objective, educational qualifications, technical skills, work experience, projects, strengths, certifications, languages known, and declaration in a structured format.

Result:

The resume webpage was successfully created using basic HTML elements and displayed in a web browser.
